

Pouch Bag

- **Pouch Bag** is an innovative packaging for any non-carbonated beverage such as olive oil, juice, wine, tea, cocktail, etc.
- Capacity: 0.75L - 5L
- Manufactured by a full automatic machine

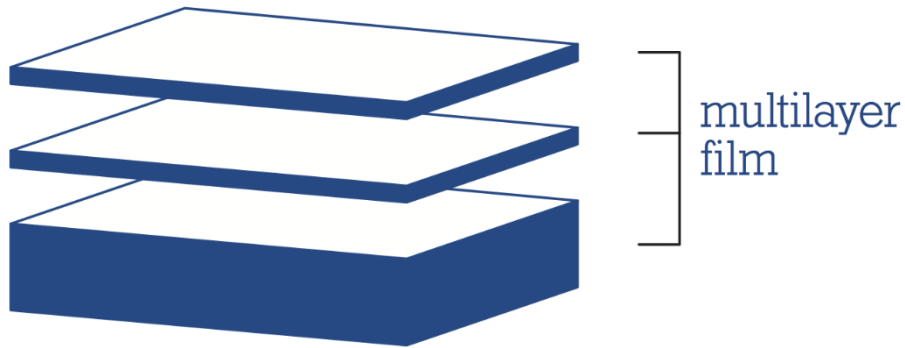

Why Pouch Bag?

- Protection
- Value for packaging
- Customer convenience
- Differentiation
- Eco-friendly

Protection like never before

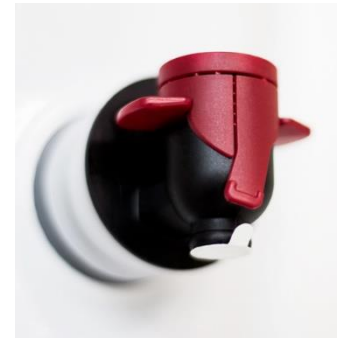

Due to the Multilayer laminated film structure

- Excellent oxygen barrier
- High UV protection
- Suitable for hot filling

Notice: The structure adapted to the type of content in order to ensure the **quality**

Due to the Tap closer

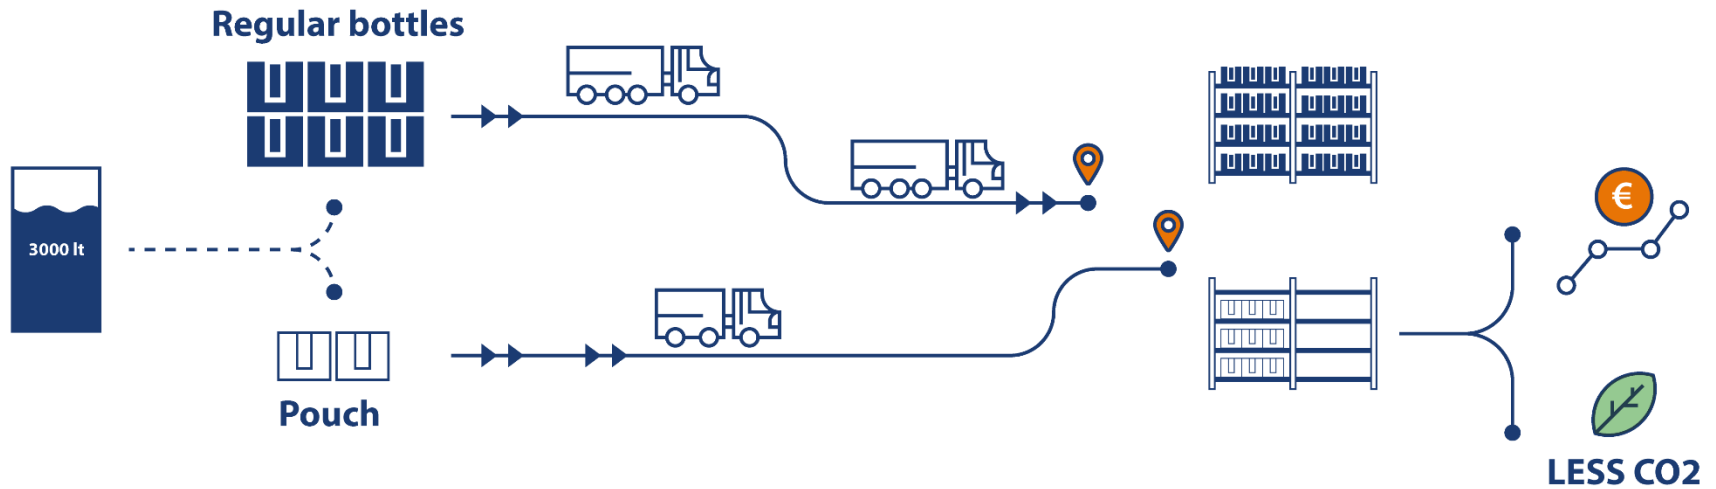

- Excellent oxygen barrier
- Preservation of the taste of the product even after opening
- Enhanced with aluminum foil that guarantees high hygienic conditions

Sustainability

- No paper is used for its production
- Less CO₂ vs glass bottle
- Low carbon footprint
- Recyclable
- Up to 85% plastic reduction

Value for packaging

- The cost per liter is lower in a pouch than in a bottle
- Improved logistics. Easy transportation and storage
- Reduce transportation costs

It's simply different

- Package differentiation on retail shelf
- Attractive communication for consumers
- Perfect package stability without outer box
- Increase sales due to the premium design of the product (High quality printing up to 8 colors)

User friendly packaging

Convenience for everyone

- Lightweight (35-40 gr), easy to carry and take away
- Easy storage and quick cooling into the fridge
- Ready to be served and to be consumed (Easy to use - Easy opening)
- Easy pouring with automatic closing: a small amount of pressure is sufficient to obtain a regular flow rate.
- Smart packaging, auto folding when it's empty.
